VINEYARD	The Cellar Selection Pinot Noir is grown in cooler Hawke's Bay sub-regions, on a variety of soil types. The different characteristics of these sites provide depth and complexity of flavour. The gravels provide structure, length and perfumed aromatics, while the clay soils provide roundness, sweet fruit and savoury characters.
WINEMAKING NOTES	After harvest at optimum ripeness, grapes were destemmed then fermented in closed top stainless steel tanks, with gentle maceration via rummage and pump-overs to extract colour and tannins. Inoculated with cultivated yeasts to promote fruit aromatics, the wine was also co-inoculated for malolactic fermentation during the primary ferment, which further enhances its fruit forwardness. Only a small proportion of oak is used to highlight aromatics and provide extra richness to the palate. This wine is bottled early to capture its vibrancy.
